

VoiceInsights Africa

Research, Data Collection, M&E and Decision Intelligence
Infrastructure

*“Every Voice. Every
Language. Every Insight.”*

VoiceInsights turns community and field evidence into traceable, decision-ready institutional intelligence.

WHO WE ARE

VoiceInsights Africa is the institutional brand and the party you contract with. **VoiceInsights Workspace** is the platform that capability runs on — instruments, collection routes, evidence chain, review workflow and publication engine.

WHAT WE RUN

36 commissionable study types across 8 categories, on 7 registered research modes — surveys, facility and needs assessments, qualitative research, monitoring, evaluation and citizen feedback.

HOW EVIDENCE ARRIVES

Phone Call · WhatsApp · SMS / Feature-Phone Fallback · Web Platform Link · Offline Mobile Application · Email — 6 registered routes into one governed pipeline.

WHO WE SERVE

NGOs and INGOs · governments and public agencies · development partners and donors · research institutions · private sector, where the registry supports it.

HOW WE WORK

Managed research delivery — we run the study. **Technology-enabled delivery** — your team runs it with us alongside. **Enterprise platform** — the Workspace as institutional capability.

GOVERNANCE

Consent recorded with the response; tenant isolation; audit trail; a publication refused rather than produced when it cannot resolve its evidence. We hold no SOC 2 report and no ISO/IEC 27001 certificate, and say so.
